

Plastering Certificate - PB102

This course is funded by Liverpool City Region Combined Authority's Adult Skills Fund.

This is a level 1 programme that will prepare you for re-engagement into education. It will develop basic practical skills in preparation for progression onto a level 2 course, recognised within the industry.

COURSE DETAILS

You'll dive into hands-on activities that build your plastering expertise, learning the specialist techniques used by professionals in the trade. Alongside this practical experience, you'll explore essential theory that highlights safe working practices in the construction industry. You'll also gain a solid understanding of the tools, materials, and methods used not only in plastering but across a range of construction trades. Basic health and safety in plastering is essential to ensure a safe working environment for everyone on site. This includes wearing the correct personal protective equipment (PPE) such as hard hats, safety boots, gloves, and eye protection to prevent injuries. Workers must be trained to handle tools and materials safely, use proper lifting techniques, keep the work area clean and free from hazards. It's also important to follow safe procedures when working at height and to be aware of the risks posed by dust, noise, and manual handling. Understanding and following these basic safety measures helps prevent accidents and promotes a responsible, professional approach to plastering.

TIMETABLE INFO

Tuesday and Wednesday 18:00 — 21:00

Start Date: September 2025 February 2026

ENTRY GUIDELINES

You must be 19 or over to study on this course.

You do not need to have any formal qualifications in this subject.

You must complete a satisfactory interview and show that you have an interest in plastering.

If English is not your first language, you may need an assessment before enrolling on this course. To discuss further, please contact the ESOL department on 0151 551 7144.

EQUIPMENT REQUIRED

All students are required to wear long legged work pants and safety footwear.

ASSESSMENT METHOD

Observation of practical tasks and basic written knowledge tests.
